# MTS Feature Update Document April 2020

Dear valued Customer,

The MTS Console (MTSC) user interface is set to be enhanced with an all-new design to create an even better and user-friendly experience for your benefit. The updated look and feel will apply across certain Betradar interfaces, and features a clearer layout, improved user-panels plus the addition of innovative features.

To allow you to get familiar with the new look, take a look at some of the new features below.

#### MTSC Landing Page

The top of the MTSC landing page now features a new icon menu, in addition to the larger buttons in the middle. With these icons you are able to navigate directly from any page, rather than having to go back to the landing page first each time to find each page.

The Liability Limit settings page now comes with a 'scroll bar' for each section. This enables you to access any changes within the required section easier and quicker, instead of having to scroll down and use the bar at the bottom.

The 'edit buttons' will remain the same, but the default will be white rather than blue, with all other changes highlighed in orange.
