21 Mar 2019	<ul style="list-style-type: none"> • Added a new replay for Field Hockey (sr:match:15121494). 4x15 minutes per quarter Field Hockey match. Ended after regular time with a result of 4:2, including several suspensions.
04 Mar 2019	<ul style="list-style-type: none"> • Removed some duplicate chapters about markets and bookings that were found in the API section. All the information is available under the markets and outcomes section (LINK)
27 Feb 2019	<ul style="list-style-type: none"> • Corrected replay match sr:match:13600533 to correctly indicate that it is a squash match and not tennis (LINK) • Added additional clarification on how rate limits work, and to what endpoint/requests they apply to (LINK)

17 Jan 2019	<ul style="list-style-type: none"> • Added additional information in chapter 2.3.4 - Message: Bet stop to clarify that only ACTIVE markets should be set to suspended during a bet stop • Added additional information in chapter 4.6 to clarify that multiple bet_settlement messages can be merged into one single bet_settlement message during recovery • Changed the wording of chapter 4.4.5 - competitors to better distinguish when describing sr:competitor and sr:simpleteam • Corrected the link in section 5.2.3 to point to the correct SDK documentation • Corrected the naming of the UnifiedFeed SDK throughout the document to be consistent to avoid confusion - In some places it was being referred to as the legacy "Bookmaker SDK" • Added information about the start_time_tbd attribute used in fixtures • Updated the bet_settlement XML example
-------------------	--

For older changes - see the attached document below for historical changes that have been made to the documentation.

Please note that earlier changes were made to a PDF version of the documentation, and section/chapter numbers no longer apply to the wiki documentation.

File	Modified
PDF File Betradar_Unified-Odds_Developer_Integration_Changelog.pdf	27/Feb/19 by Espen Grinde

CustomBet	
Date	Description of changes
12 Jul 2019	<ul style="list-style-type: none"> • CB is now supported by the SDK • Rate limits for custombet have been updated and are now finalized • Added a note about response codes (see table "response code" in THIS section) • Added some information/steps on how to implement settlements in Custombet • Added a note to the market overview that only x.5 lines are supported for markets using the "total" specifier
07 May 2019	<ul style="list-style-type: none"> ▪ New tables have been created for a better and updated overview of the available endpoints, elements, attributes and possible values ▪ Response code section has been expanded ▪ Added the initial rate limit values ▪ Added the initial section for ladder configuration (will be covered in more detail in the Ctrl documentation) ▪ Updated XML examples to match the correct and updated responses from the API
08 Mar 2019	Added some clarification that the bet settlements in CustomBet come from the Unified Odds Feed and not the CustomBet API itself (link)
