## XML configurations

Sport specific XML configurations for beach volleyball.

### (ID: 33) Multiple bets of same type active at once for beach volleyball matches

The Live Odds system selects the most balanced bet (line, spread, etc) out of all available ones for each market, and only this one will be sent out to the client system. Enabling this setting will allow multiple bets of the same type to be sent out at once, not only the most balanced ones. E.g. for the total market in soccer the most balanced line would be 2.5. When enabling the setting total 1.5 and 3.5 would be sent as well.
