XML configurations

Sport specific XML configurations for cricket.

(ID: 96) Include penalty runs in cricket

Enabling this setting will add the attributes penalty_runs_home and penalty_runs_away to the Match element for cricket matches.

XML example

```
<BetradarLiveOdds xmlns="http://www.betradar.com/BetradarLiveOdds"
timestamp="1413534449872" time="0" status="betstart">

	penalty_runs_away	How many penalty runs the away team has.	Number >= 0

(ID: 98) Multiple bets of same type active at once for Cricket matches

The Live Odds system selects the most balanced bet (line, spread, etc) out of all available ones for each market, and only this one will be sent out to the client system. Enabling this setting will allow multiple bets of the same type to be sent out at once, not only the most balanced ones. E.g. for the total market in soccer the most balanced line would be 2.5. When enabling the setting, total 1.5 and 3.5 would be sent as well.
