Sport specific XML elements and attributes

This section explains what elements / attributes one can expect for darts matches in addition to the standard elements and attributes.

XML example

```
<BetradarLiveOdds xmlns="http://www.betradar.com/BetradarLiveOdds"
status="betstart" time="0" timestamp="1412524848268" type="
scoutmatch">
<Match active="1" betstatus="started" legscore="501:501" matchid="
6198374" msgnr="61" score="0:0" setscores="0:3" status="in_progress"
throw="1" visit="1"/>
</BetradarLiveOdds>
```

XML attributes definition

Element	Attributes		
	Attri bute	Description	Possible values
Match	<i>legscore</i>	Current score in the leg.	Score in range "[0-501];[0-501]"
	<i>throw</i>	Which player got the first throw for the current leg.	1 = home 2 = away
	<i>visit</i>	The player which is visiting the board.	1 = home 2 = away

XML configurations

Sport specific XML configurations for darts.

(ID: 76) Multiple bets of same type active at once for darts matches

The Live Odds system selects the most balanced bet (line, spread, etc) out of all available ones for each market, and only this one will be sent out to the client system. Enabling this setting will allow multiple bets of the same type to be sent out at once, not only the most balanced ones. E.g. for the total market in soccer the most balanced line would be 2.5. When enabling the setting, total 1.5 and 3.5 would be sent as well.

(ID: 104) Early bet status in darts

Enabling this setting will trigger an early betstart if a betstop has been set because a player is on possible checkout.

Match statuses

ID	Status	Status description	Additional information
0	not_started	Not started yet	-
21	in_progress	The match is in progress	-
30	paused	Match is paused	-
