Snooker specific XML elements and attributes

This section explains what elements, sub-elements and attributes one can expect for snooker matches in addition to the standard elements and attributes.

XML example

```
<BetradarLiveOdds xmlns="http://www.betradar.com/BetradarLiveOdds"
status="betstart" time="0" timestamp="1414574453652">
<Match active="1" betstatus="started" matchid="2097712" msgnr="5"
remaining_reds="15" score="0:0" setscore1="0:0" status="in_progress"
visit="1"/>
</BetradarLiveOdds>
```

XML attributes definition

Element	Attributes		
	Attribute	Description	Possible values
Match	visit	Which player is currently visiting.	1 = home team 2 = away team 0 = undefined
	remaining_reds	Number of remaining red balls.	Integer

XML configurations

Sport specific XML configurations for snooker.

(ID: 78) Multiple bets of same type active at once for snooker matches

The Live Odds system selects the most balanced bet (line, spread, etc) out of all available ones for each market, and only this one will be sent out to the client system. Enabling this setting will allow multiple bets of the same type to be sent out at once, not only the most balanced ones. E.g. for the total market in soccer the most balanced line would be 2.5. When enabling the setting, total 1.5 and 3.5 would be sent as well.

(ID: 127) Include snooker markets for frames which might not be played

If set, then markets for frames which may not be played will be included in the feed, example frame 6 when matchscore is 4:0 in best of 9.

Match statuses

ID	Status	Status description	Additional information
0	not_started	Not started yet	-
21	in_progress	The match is in progress	-
30	paused	Match paused	-
445	session_break	Session break	-
100	ended	The match has ended	-
