Sport specific XML elements and attributes

This section explains what elements, sub-elements and attributes one can expect for table tennis matches in addition to the standard elements and attributes.

XML example

```
<BetradarLiveOdds xmlns="http://www.betradar.com/BetradarLiveOdds"
status="betstart" time="0" timestamp="1414658826975">
<Match active="1" betstatus="started" expedite="0" matchid="2097712"
msgnr="3" server="1" score="0:0" setscore1="0:0" status="1set"/>
</BetradarLiveOdds>
```

XML attributes definition

Element	Attributes		
	Attribute	Description	Possible values
Match	expedite	Whether the expedite system is in operation or not.	1 = expedite system enabled 0 = expedite system disabled
	server	Which player has the serve at that moment. This is an optional attribute and will be set once the first server is known.	1 = player one 2 = player two.

XML configuration

Sport specific XML configurations for table tennis.

(ID: 80) Multiple bets of same type active at once for table tennis matches

The Live Odds system selects the most balanced bet (line, spread, etc) out of all available ones for each market, and only this one will be sent out to the client system. Enabling this setting will allow multiple bets of the same type to be sent out at once, not only the most balanced ones. E.g. for the total market in soccer the most balanced line would be 2.5. When enabling the setting, total 1.5 and 3.5 would be sent as well.

ID	Status	Status description	Additional information
0	not_started		-
8	1set		-
301	pause1		-
9	2set		-
302	pause2		-
