Sport specific XML elements and attributes

This section explains what elements / attributes one can expect for Volleyball matches in addition to the standard elements and attributes, and what the meaning of those elements and attributes is.

Attributes in the <event> element

XML example

```
<match betstatus="BETSTOP" connectionstatus="1" device="5" extrainfo="0" feedtype="full" matchid="
10114593" matchtime="0:00:00"
numberofsets="5" start="1464768000000" t1id="7026026" t1name="TEST 1" t2id="7026025" t2name="TEST 2">
...
</match>
```

XML elements and attributes definition

Element	Attributes		
	Attribute	Description	Possible values
Match	*extrainfo*	Integer specifying special information for the match.	Integer. Possible values: • 0 = Default • 8 = Best of 3 sets • 15 = 21 points set limit • 34 = 25 point set limit, tech-timout on 12 • 44 = Best of 7 sets 15 point limit
	firstservegoldenset	Which player has first serve in the golden set. Please note that this attribute needs to be enabled in the XML configuration options first.	Integer
	firstservetiebreak	Which player has first serve in the tiebreak.	Integer
	firstserve	Which player has first serve of match.	Integer
	numberofsets	How many sets are being played in the match.	Integer

Elements in <match> element

XML example

```
<match betstatus="BETSTOP" connectionstatus="1" device="5" extrainfo="0" feedtype="full" matchid="
10114593" matchtime="0:00:00"
numberofsets="5" start="1464768000000" t1id="7026026" t1name="TEST 1" t2id="7026025" t2name="TEST 2">
<status id="0" name="NOT_STARTED" start="0"/>
<score t1="0" t2="0" type="match"/>
<score t1="0" t2="0" type="set1"/>
<serve team="home"/>
<tournament id="1" name="Premier League"/>
<category id="1" name="England"/>
<sport id="23" name="Volleyball"/>
<events/>
</match>
```

XML elements and attributes definition

Element	Attributes		
	Attribute	Description	Possible values
score	Multiple occurrences possible, each occurrence describes the amount of points for the specified period in the match. This element always gets included in full feed, and in the delta feed for the following events: Volleyball full score (1046)		
	t1	Amount of points home team.	Integer
	t2	Amount of points away team.	Integer
	type	For what period in the match the points were scored.	String. Possible values: • match • set1 • set2 • set3 • set4 • set5 • goldenset • goldensetmatch
serve	This element always gets included, in both the full feed and the delta feed.		
	team	Which team served.	String. Possible values: • "home" • "away"

Attributes in the <event> element

XML example

```
<match matchid="9559079" ... >
<events>
<event extrainfo="0" id="650908581" info="24:16 [T1]" matchscore="2:0" mtime="1:32:14" setnumber="3"
setscore="24:16" side="home"
stime="1465716682281" type="1046"/>
</events>
</match>
```

XML attributes definition

Element	Attributes		
	Attribute	Description	Possible values
event	extrainfo	Attribute containing additional information about the event.	Integer
	matchscore	Score for current match.	String. Format: "[home]:[away]" Example: "1:0"
	setnumber	The number of the current set in the match.	Integer
	setscore	Score for current set.	String. Format: "[home]:[away]" Example: "5:4"
	extrainfovolleyball	Attribute containing additional information about the event.	String

XML configurations

This section explains what elements / attributes one can expect for volleyball matches in addition to the standard elements and attributes, and what the meaning of those elements and attributes is.

(ID: 48) Deep coverage volleyball

Enabling this setting will add a new attribute firstservegoldenset to the <match>-element for volleyball matches. This attribute contains information about what team served first in the golden set.

XML example

```
<match betstatus="BETSTOP" connectionstatus="1" feedtype="delta" firstserve="home" firstservegoldenset="
home" matchid="1103190216"
numberofsets="3">
<!-- Other match info and events truncated -->
</match>
```

(ID: 34) Include attribute extrainfovolleyball

Enabling this configuration will include the attribute "extrainfovolleyball" (values found in the event table above) in the feed.
