UOF - Goalscorer markets

Goalscorer markets refer to markets that specifically deal with goal scoring. Market versions for first and last *goalscorer* markets are available. These will work the same way as outcome versions for the outright markets. When a new version is generated, the old version will be invalidated:

<odds_change product="3" event_id="sr:match:13805747" timestamp="1535052866209">
  <odds>
    <market status="0" id="893" specifiers="variant=sr:goalscorer:fieldplayers_nogoal_owngoal_other|version=4c949570"/>
    <market status="0" id="892" specifiers="variant=sr:goalscorer:fieldplayers_nogoal_owngoal_other|goalnr=1|version=4c949570"/>
  </odds>
</odds_change>
```

All versions will be included in the settlement for first/last goalscorer.

  <outcome id="sr:player:836661" result="0"/>
```

All versions (first/last goalscorer) will be sent in a UF recovery.

Mapping for goalscorer markets

The following list shows the mapping for first and last goalscorer markets based on the different selection of feed options:

1. "only players – no goal" -> map to 38/39; with no goal outcome always void and deactivated
2. "players and no goal" -> map to 892/893 with version, no goal outcome that support settlement
3. "players, no goal, and other" -> map to 892/893 with version, no goal outcome, other outcome
4. "players, no goal, other, and own goal" -> map to 892/893 with version, no goal outcome, other outcome, own goal outcome
