

# UOF - Specifiers

## Specifiers

In the Legacy Live Odds there is a concept called *Special Odds Value*. The equivalent in Unified Odds are called *specifiers*. The Unified Odds specifiers is a cleaned up version of the special odds values that provides a uniform and descriptive way of specifying additional parameters that uniquely identifies a [market](#).

The differences are that legacy Live Odds only sends the values separated with a separator (usually a / symbol), while Unified Feed sends a key/value pair separated by the | symbol. The following example is from a cricket match, where the over/under bet of 2.5 (total=2.5) is set to the 5<sup>th</sup> "over" in the cricket match, represented by the "overnr=5" value.

- Legacy special odds value: "5/2.5"
- Unified feed specifiers: "overnr=5|total=2.5"

All market descriptions can be looked up [HERE](#) under Betting descriptions. Market descriptions endpoint - `/descriptions/{language}/markets.xml`

```
<market id="357" name="{!inningnr} innings over {overnr} -
{$competitor2} total" groups="all|score|over">
  <outcomes>
    <outcome id="13" name="under {total}"/>
    <outcome id="12" name="over {total}"/>
  </outcomes>
  <specifiers>
    <specifier name="inningnr" type="integer"/>
    <specifier name="overnr" type="integer"/>
    <specifier name="total" type="decimal"/>
  </specifiers>
</market>
```
