

# LO - Bet clearing

In case an event happens in a match which defines the outcome of a specific oddstype, the Betradar system sends out a clearbet message. Clearbet messages contain information about the outcome of bets, and in some cases also whether the bet was voided or not. If the bet is (partly) voided, the voided part should be refunded to the customer.

All possible combinations of outcome and voidfactor:

- outcome="0" and no voidfactor: Lose entire bet
- outcome="1" and no voidfactor: Win entire bet
- outcome="0" and voidfactor="1": Refund entire bet
- outcome="1" and voidfactor="0.5": Refund half bet and win other half
- outcome="0" and voidfactor="0.5": Refund half bet and lose other half

## NOTE

Evaluation of the bet outcomes is the responsibility of the Client system.
