

LO - Rollback

If the Betradar system should send out wrong information about bet clearing, a rollback message will be sent when the situation is discovered.

```
<BetradarLiveOdds xmlns="http://www.betradar.com/BetradarLiveOdds"
status="rollback" time="17" timestamp="1199436168440">
<Match active="1" betstatus="stopped" clearedscore="2:0" matchid="
661373" matchtime="9" msgnr="45" status="lp">
<Odds active="1" combination="0" freetext="Next goal" id="1379"
specialoddsvalue="1:0" subtype="13" type="ft3w" typeid="6">
<OddsField active="1" outcome="1" type="1"/>
<OddsField active="1" outcome="0" type="x"/>
<OddsField active="1" outcome="0" type="2"/>
</Odds>
</Match>
</BetradarLiveOdds>
```

XML attributes definition

Element	Attributes		
	Attribute	Description	Possible values
BetradarLiveOdds	status	What kind of information is contained in the message.	String "rollback" (in case of a rollback message)
	time	The amount of seconds which have passed since the betclearing. The time for the original bet clearing is timestamp - time (in seconds).	Integer
Match	clearedscore	The cleared score of the original bet clearing.	String Format: "[homescore]: [awayscore]"
Odds	id	Unique identifier which corresponds to the odds elements in the previously sent out odds change and betclear messages. This id explains what bet the rollback is for.	Integer

Note

The Odds element includes OddsField elements to indicate which fields were cleared in the original bet clearing. The Client system is responsible for handling this accordingly.
