LD - Odds suggestions

Suggested Live Odds are constantly updated and sent out according to the match happenings. These odds are generated based on statistical models. The format of the XML for odds is the same as the XML in the Live Odds feed.

XML example

```
<OddsSuggestions matchid="944423">
<Odds bookId="12" changenumber="1" description="Who wins the rest of the
match?" guthMatchId="944423" manualActive="1" matchId
="944423" specialOddsValue="0:0" subtype="4" type="19" validDate="
1244794244648">
<OddsField description="Home" side="home">2.5</OddsField>
<OddsField description="Draw" side="draw">2.9</OddsField>
<OddsField description="Away" side="away">2.85</OddsField>
</Odds>
<Odds bookId="12" changenumber="1" description="Next Goal" guthMatchId="
944423" manualActive="1" matchId="944423"
